## Key Grip

After school I studied Electrical Engineering and then found the film industry.

I've worked in the film industry for 15 years.

This includes working at Service Vision Systems making Scorpio remote heads, cranes and remote lens control systems.

I've worked on US and Australian feature films, TV shows and commercials as a remote head and crane technician and dolly grip.

Two years ago I build a new grip truck and have been Key Gripping since. I've mostly done TVCs and some short films.

See a list of Film/TV credits on pg.2
