Having started in the film industry in 1986 as a grip, working with most of the top production companies and directors over the following 14 years.
In 2000 I began working as a 1 ST AD and have continued to do so over the following eleven years.

A long history of gripping proves to be invaluable as a First Assistant Director on every shoot. Not only does it give me an understanding of what is required to prepare all camera positions as well as an understanding of lighting and rigging requirements that contribute to the pre production process,

With an understanding of what is required from all areas of production, this gives me the ability to formulate all reference and shooting requirements into a detailed computer friendly shooting board and schedule.

Working from a Mac Book Pro with OSX. Version 10.6.8 software, photoshop, a digital stills and mini DV camera, scanner, printer and with broadband internet access.

In addition I have completed the OH&S certified course.
Please see below a work history and some more recent productions.
